Professional Summary

Senior DevOps/SRE & Platform Engineering Leader with 15+ years of experience leading cloud-native transformations, Kubernetes platforms, GitOps/IaC adoption, observability, FinOps, and high-availability systems for banking, fintech, insurance, and crypto companies. Tech Lead DevOps/SRE at Ripio, spearheading cloud-native AWS infrastructure, SRE operating models, AI-assisted platform engineering, and autonomous AI development workflows.

Experience

Ripio

Tech Lead DevOps/SRE — Jun 2023 – Present

- Orchestrated the end-to-end migration of legacy infrastructure to a newly structured, cloud-native AWS organization, supporting high-throughput wallet services, yield protocols, and low-latency automated trading operations.
- Spearheading the "Dark Factory" initiative, an innovative AI-driven development workflow where autonomous AI agents (Dev, QA, Security) sequentially execute tasks and validate features directly within Merge Requests, accelerating the SDLC.
- Architected an LLM-Assisted Platform Engineering workflow via a custom Claude AI plugin and an architectural assistant, integrating with on-premise GitLab and AWS EKS. This grants developers the autonomy to design and instantly provision Infrastructure as Code (IaC) and secure ephemeral lab environments while strictly enforcing internal standards.
- Designed an enterprise-wide GitOps model (ArgoCD, Terraform/Terragrunt), achieving near 100% IaC coverage and reducing environment provisioning time from days to minutes.
- Established comprehensive SRE operational models and SLIs/SLOs for critical microservices, architecting an advanced observability stack (Datadog, Grafana, Prometheus) that ensures 99.99% uptime even during high-volatility market events.
- Led FinOps initiatives, optimizing cloud resource allocation via advanced Kubernetes auto-scaling (Karpenter, KEDA), cutting annual cloud infrastructure costs by over 30%.

Vortech / Sopra / Santa Lucía

Head DevOps/SRE — Sep 2021 – Jun 2023

- Led the digital transformation strategy for Santa Lucía, spearheading the successful migration of legacy applications to a modern OpenShift 4 Kubernetes cluster.
- Managed and mentored a specialized platform engineering team of 5 (3 DevOps, 2 SREs) to execute the transformation roadmap and establish an Agile culture across the engineering department.
- Architected a modern PaaS platform leveraging hybrid cloud environments (AWS/Azure), enabling seamless legacy modernization and cloud-native application delivery.

- Standardized secure software delivery pipelines (DevSecOps), integrating advanced code analysis tools (Sonar, Kiuwan) to ensure strict compliance with financial and insurance industry regulations.
- Championed Developer Experience (DevEx) by introducing self-service platform tools like Backstage to accelerate developer velocity.
- Optimized end-to-end monitoring and logging infrastructure (ELK/Dynatrace), preventing major production incidents through automated alerting and predictive capacity planning.

Santander Tecnología

Tech Lead Site Reliability Engineer — Sep 2020 – Sep 2021

- Served as the Technical Lead for the SRE unit, ensuring the scalability, observability, and high availability of core retail banking services capable of handling millions of daily transactions.
- Designed high-availability PaaS and Cloud architectures engineered to handle massive transactional traffic and peak financial event loads without degradation.
- Automated infrastructure scaling and zero-downtime deployment strategies (Canary, Blue/Green) across enterprise Kubernetes clusters.
- Championed SRE and Agile practices across multiple development squads, effectively bridging the gap between operations and software engineering to accelerate feature time-to-market.
- Implemented robust disaster recovery (DR) protocols and automated chaos engineering drills to guarantee zero-data-loss compliance in highly regulated production environments.

HSBC

DevOps Engineer — Sep 2019 – Sep 2020

- Automated DevOps dashboards and designed operational models (DevOps operating model, SRE, Agile squads) and architectures.
- Defined WebSphere middleware architecture.

Banco Comafi

DevOps Architect — Aug 2018 – Sep 2019

- Defined toolstack (version control, CI/CD orchestration, code analysis tools).
- Designed operational models (DevOps operating model, SRE, Agile squads) and architectures (OpenShift design, resources, etc.) for Comafi Private Cloud PaaS.
- Worked closely with Comafi strategy for AWS cloud.

Banco Galicia

DevOps Architect — Sep 2015 – Aug 2018

- Led the digital transformation DevOps engineering unit.
- Utilized Agile methodologies.
- Defined the CI/CD strategy, creating pipeline stages in Bash, DSL, and custom Groovy libraries.
- Customized and configured CI/CD tools (Jenkins, Git, Nexus, Sonar, Selenium).
- Defined utilization of Kubernetes infrastructure (OpenShift 3.6/3.9/3.11), container auto-scaling limits, route exposure, health checks, liveness/readiness checks, and deployment strategies (Canary, Blue/Green).

- Managed monitoring and logging tools, including ELK (Elasticsearch, Logstash, Kibana) and EFK (Elasticsearch, Fluentd, Kibana).
- Collaborated with development teams to maintain standards when creating customized images (Dockerfiles).
- Troubleshoot image creation and compilation issues (Maven, Pip for Python, npm for Node.js/React apps).

Banco Credicoop

SysAdmin Sr — Sep 2010 – Sep 2015

- Interacted with clients and cross-functional teams to deliver solutions for new environments.
- Coordinated and implemented infrastructure changes to optimize environment performance.
- Performed advanced troubleshooting and log analysis to resolve complex production issues.
- Installation, configuration, testing and maintenance over Integration, Certification, Development and Production servers.
- Application deployment and removal.
- SSL certificates installation, renewal and profile association.
- IBM WebSphere Application Server V6.0/6.1/7.0/8.0, IBM HTTP Server, Apache (Tomcat and WebLogic plugins), Tomcat, iPlanet WebServer / WebLogic plugin configuration, WebLogic Server 8.x/9.x, JBoss, IBM WebSphere MQ, F5 BIG-IP.

Global Strategy

SysAdmin Ssr — Aug 2007 – Sep 2010

- Managed and monitored Linux servers to ensure optimal performance.
- Prevented infrastructure incidents through proactive maintenance and system improvements.
- Monitored network infrastructure to detect failures and provide rapid resolutions.

Skills

- **Artificial Intelligence & Agents:** Autonomous AI Agents, LLM Integration (Claude), Model Context Protocol (MCP), Local LLMs Architecture (Qwen, BitNet), Prompt Engineering.
- **Cloud & Infrastructure:** AWS (EC2, ELB/ALB/NLB, S3, RDS, Aurora, DynamoDB, DocumentDB, ElastiCache, Lambda, API Gateway, IAM, KMS, Secrets Manager, CloudFront, ACM, EBS), Azure, VMware vSphere, KVM, Xen, Linux (RHEL), F5.
- **Kubernetes & Containers:** EKS, AKS, OpenShift, Docker, Podman, crictl.
- **Web3 & Crypto Ecosystem:** DeFi Protocols, Crypto Nodes.
- **IaC & Automation:** Terraform, Terragrunt, Ansible, Helm, Kustomize, Crossplane, Atlantis, Backstage, Karpenter, KEDA, Jinja.
- **CI/CD & DevSecOps:** Jenkins, GitLab CI, ArgoCD, Tekton, Jenkins-X, Paketo, Kaniko, Crane, SealedSecrets, SOPS, Git, GitHub, BitBucket, SonarQube, Kiuwan, Nexus, Quay, AWS ECR, Harbor.
- **Observability & Monitoring:** Datadog, Grafana, Prometheus, Nagios, Zabbix, Dynatrace, AlertManager, ELK Stack (Elasticsearch, Logstash, Kibana), Fluentd.
- **Databases, Messaging & Middleware:** MariaDB, MongoDB, Redis, Postgres, InfluxDB, Kafka, AMQ, RabbitMQ, IBM WebSphere Application Server, Apache Tomcat, JBoss, Nginx, Traefik, Red Hat 3scale, Red Hat SSO.

- **Languages, Frameworks & Mobile:** Python, Bash, Groovy, Java, SpringBoot, .NET Core, React, React Native, Expo, Angular.

Education

- Licenciado en Informática, Universidad Siglo 21.

Languages

- English: B1

Courses

- D180: Introduction to building and managing Docker containers for deployment on a Kubernetes cluster (Red Hat)
- D280: Create, configure, manage, and troubleshoot OpenShift clusters (Red Hat)
- Agile workshops delivered by McKinsey coaches
- IBM WebSphere Application Server 6.1/7/8.5/9 (VA361)
- IBM WebSphere DataPower (VB557)
